

Bird Deflector

Data sheet

KALA®

*Ideas for
the roofs!*

Function:

Bird deterrence measures, especially against pigeons. The spiky sections prevent birds from resting and nesting and thereby help to keep buildings clean as well as reduce the nuisance factor posed by birds. The rounded tips prevent injury to the birds.

Options:

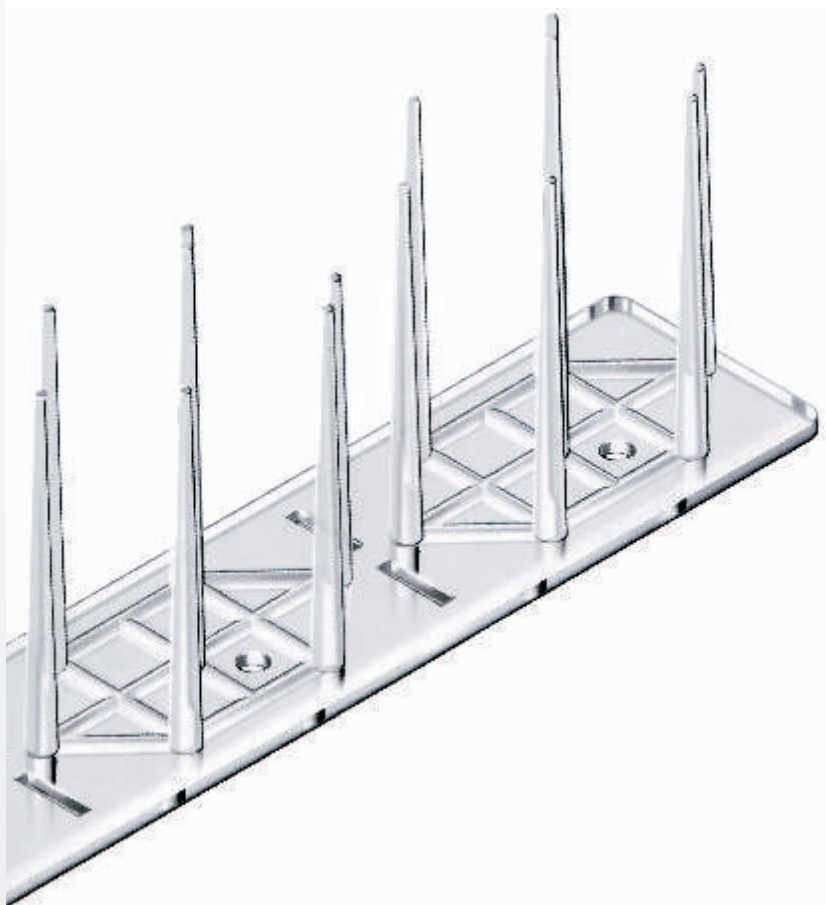

Standard option transparent, Special colours on request.

Dimensions:

Length L 250 mm
Width W 50 mm
Height H

Packing:

packed in box;
packing unit = 50 pieces
(equals 12,5 lm)

Custom-made products cannot be exchanged.
